Rémi Maigrot

Software Developer

Permanent contract · **Full remote or hybrid** · **Available immediately**

> An Epitech graduate, I have spent the last 3 years between startups, projects built with people close to me and freelance work. I like taking a project from the idea all the way into the hands of **real users**. Used to working with a wide range of languages and tools, I pick up a new technology quickly.

EXPERIENCE

Software Engineer — Final-year internship
Apr 2026 – Oct 2026
RGPD START · GDPR compliance SaaS company · Bordeaux

- Built the team's **internal application**, front end and back end.
- Set up a system that publishes **20 articles and guides every Monday** on the website, fully automatically (Payload CMS + AI).
- Contributed to the **website** and managed its SEO, in a team of fewer than 10 people.

Co-founder & Software Engineer
Sept 2025 – May 2026
Blaiz · no-code AI agent platform for SMEs

- Designed and built the platform (Next.js, Supabase, RAG) with full autonomy.
- Set up **CI/CD and deployment**, then supported the application in production.

Co-founder & Head of Product
Aug 2024 – Aug 2025
Formagold · SaaS marketplace for online courses

- Team of 3: I handled the whole **back end**, the CMS and **Stripe payments**.
- Worked on SEO until we ranked **#1 on Google** for our keywords.

Full-Stack Developer — freelance
Since Jan 2024
Self-employed · clients: born-to-smile.fr, Guildex, SnapyRex...

- Websites and web/mobile apps for clients: we discuss the need, then I build, ship and maintain.

Software Engineer — Internship
Feb 2024 – May 2024
CHU de Bordeaux · university hospital

- Sole developer of an internal audit tracking app (Django, MySQL), built with the teams who used it.

Full-Stack Developer — Internship
Aug 2022 – Dec 2022
KSB · Gradignan

- Scrum team of 3 to 5 developers: features, bug fixes and tests (Ruby on Rails, Vue.js).

EDUCATION

Software Engineering degree · 5-year programme, master's level
2021 – 2026
Epitech · Bordeaux

MSc Computer Science (AI), 1st year · taught in English
2024 – 2025
Jönköping University · Sweden

PERSONAL PROJECTS

Quant trading system
Macro quant trading: strategies with decorrelated edges on US markets, for ~1 year.

dotnet-preview-platform
On every pull request, a C# operator deploys a leave-request API, PostgreSQL and test data to Kubernetes, then runs the tests.

Alpha Nomad
AI-driven automated trading community (co-founder): Next.js site, courses and a backtesting tool on real market data.

Speaker
Epitech final-year project: AI text-to-speech with voice cloning and emotion control.

Old Money Stockholm
Co-founded e-commerce brand (Shopify): #1 on Google through SEO, ads and social media.

Guildex
Directory platform for the construction trades (freelance project): Next.js, Tailwind CSS.
